OUTDOOR - GROWN SEEDLINGS

All our SEEDLINGS are grown entirely without Glass from the very best strains of seed; they are all transplanted either in boxes or open beds—not just pulled from the seed bed.

Where available, Seedlings from seed beds (untransplanted) are supplied at a much lower rate, but need care.

FOR AUTUMN AND WINTER PLANTING.

The following all at 8d. dozen; 5/- 100.

SNAPDRAGONS, 10 colours	ARCTOTIS ORGANDIS
CALENDULA	CANTERBURY BELLS
CARNATIONS	GAILLARDIAS
LUPINS	CORNFLOWERS
DIANTHUS	PRIMULA MALACOIDES
ICELAND POPPY, Pink	DAISIES (Montrosa)
ICELAND POPPY, Sunbeam	LEPTOSYNE
NEMESIA	SWEET PEAS
SALPIGLOSSIS	WALLFLOWER
STOCKS, Nice Mixed	

The following all at 1/- dozen; 6/- 100.

ANEMONES, St. Brigid	CINERARIAS
AQUILEGIAS, Long-spurred	PETUNIAS, best
DELPHINIUMS, Kelway's	DELPHINIUM, Blue Butterfly
RANUNCULUS	PANSIES, best
PENTSTEMONS	GEUMS
HOLLYHOCKS	VIOLAS, in variety

SEARL'S No. 1 SNAP—

100 Choice Seedlings in 10 Seasonable Varieties, at 8d. doz., for 4/-; Post Free, 5/-.

100 Any One Variety, at 8d. doz., for 4/-; Post Free, 5/-.

100 in 10 Varieties, at 1/- doz., for 5/-; Post Free, 6/-.

100 Any One Variety, at 1/- doz., for 5/-; Post Free, 6/-.

Searl's Snap Lines are for Cash with Order Only.

FOR SPRING AND SUMMER.

The following all at 8d. dozen; 5/- 100.

ALTERNANTHERA, Bedding	SCABIOUS
AMARANTHUS, sorts	SNAPDRAGONS, sorts
ASTERS, sorts	SUNFLOWERS
BALSAMS, Double	ZINNIAS
CALLIOPSIS	COLEUS 1/6 doz.

RECEIVED

★ JUL 19 1931 ★

We have pleasure in advising that, owing to the easing in production costs, we are able to offer most lines at reduced rates compared with those of previous years, but such prices are subject to any fluctuation of money values and may be altered without further notice.

To save catalogue space many varieties in the case of Fruit Trees, Shrubs, Climbing and Herbaceous Plants have had to be deleted from this list. Any variety previously listed in our larger catalogue can be supplied. Where the selection of varieties, as in the case of Fruit Trees, Roses, etc., is left to us, customers may be assured of the very best selection and suited to their district.

Thanking our numerous customers for their past patronage and trusting for a continuance of same.

SEARL'S LIMITED.

Terms of Business

CONDITIONS OF SALE.—We believe that all plants, seeds, etc., sold by us are of the description and kind specified by us at the time of sale and are true to label; but owing to the practical impossibility in many cases of being certain of this, beyond refunding the original money paid for wrongly named goods or supplying others in their place, we further give no warranty, expressed or implied, as to their living, growth, description, quality, or productiveness, and make all sales subject to these conditions. If the purchaser does not accept the goods sold to him on these terms they are to be returned to us at once.

SUBSTITUTION.—As the season advances some varieties become out of stock, and unless otherwise stated in order will substitute the variety most closely resembling.

COMPLAINTS.—While every reasonable care is taken in filling orders, errors sometimes occur, and upon receipt of complaint will rectify same if considered justified.

QUANTITIES.—Not less than six at dozen rate; not less than fifty at hundred rate.

TERMS.—Cash on receipt of invoice. Country clients please add exchange to cheques. M.O. and P.N. to be made payable to Searl's Ltd.

CORRESPONDENCE.—All Correspondence to be addressed to

ROSE PLANTING AND CULTURE

The Rose is generally hardy and makes generous response to every bit of care and attention bestowed on it, and the quality and quantity of blooms produced are also influenced proportionately by this factor.

The following hints should be of assistance to growers, but as each garden has its own peculiar aspects, I shall be pleased to furnish further information to customers regarding their own particular problems.

POSITION.

Roses may be planted anywhere in the garden providing they get a fair share of sunshine. Planting in the shade of trees and large shrubs, or in narrow, draughty passages should be avoided. Such conditions favour the fungus diseases—mildew and black spot—besides causing the plants to grow very weak and spindly.

SOIL.

All soils will grow good roses, but they prefer heavy, loamy ground. In light sandy soil they will be benefited by the adding of heavy loam and cow manure.

PREPARATION OF SOIL.

The soil should be worked at least eighteen inches deep, and, as most new ground is somewhat acid or sour, some lime should be worked in during the process. It is advisable that this operation be done some weeks before planting. Draining is always advisable, and is necessary in soil of a stiff, clayey nature.

PLANTING.

Roses may be planted from April to August (inclusive). Plant Roses with the union of stock and rose proper just under the ground level. The roots should be well spread out, giving the tips a downward tendency, covered with fine earth, firmed well with the foot and then watered to settle the soil. When the water has soaked away, fill in the wet hole with loose soil. Do not put any fresh animal manure near the roots of newly-planted Roses, as the fermentation set up by new manure is too severe for anything but well-established plants. Be sure you do not plant strong and weak growers indiscriminately, as often the effect of an otherwise nicely laid-out border or bed is spoilt by overlooking this important point. Four feet apart for strong and two feet for smaller growers will be found sufficient, placing the stronger growers in the background or centre and the smaller growers in front.

I recommend the planting of certain varieties in masses and borders in preference to the old style of dumping them in higgledy-piggledy in mixed varieties, as the planting of a few choice lines in pleasing shades that will blend gives a wonderful effect in the garden. Water only when necessary, and then do it thoroughly, giving the soil a light loosening afterwards when dry enough, to prevent the caking of the soil.

MANURING.

Any kind of animal manure will suit Roses, and the main manuring should be done immediately after the winter pruning. Further dressings of manure may be applied during the growing season, or,

failing this, a handful of blood and bone manure per tree will stimulate new growth. An application of lime every two or three years is also beneficial.

PRUNING.

In colder climates the pruning should be done in late August or early September, and in temperate climates from middle to end of July.

Before commencing to prune a bush study its habit of growth. Remove all the weakly and worn-out growth, leaving only a few selected strong growths to make a nice shapely plant. These should be cut back according to the growth of the variety. To leave about eighteen inches of cane on strong growers will be found sufficient, but weaker growers should be pruned more severely. Prune to an outside eye and so avoid cross growths. Climbers should have all old, exhausted wood removed, the long canes shortened slightly and tied into position, and all lateral growths cut to two or three eyes. They can be lightly pruned again in January by shortening flower laterals to two or three eyes.

DISEASES AND PESTS.

MILDEW.—This fungus disease forms a greyish coating on the foliage. Spray with Liver of Sulphur 1 oz. to 2 gallons, or 4 oz. Bicarbonate of Soda to four gallons of water. The simplest method is dusting with flowers of sulphur, using a coarse hessian or muslin bag, when the foliage is damp with dew.

BLACK SPOT.—This fungus disease penetrates the foliage, and is practically impossible to cure. Affected foliage should be picked off and the plants treated by spraying with Liver of Sulphur or dusting, as recommended for mildew.

THRIPS.—These insects usually attack strongest in the Spring, and, as they feed on the petals and sap, their presence will soon be noticed by the edges of the petals becoming brown and shrivelled. As the thrip penetrates to the very heart of the flowers it is impossible to treat the pest without spoiling the blooms. To pick the old blooms and burn them seems the best possible thing to do. The dark blooms are not so easily spoiled.

APHIDES.—The aphides, or green fly, are sucking insects, and not leaf eating, and, attacking the young growth, suck the sap or life blood of the plant. They may be easily killed by spraying with "Blackleaf 40" (Nicotine Sulphate) as directed on containers.

RED SPIDER.—These tiny insects work on the underside of the leaves, giving the foliage a discolored, mottled appearance. Spray with "Blackleaf 40" as directed on containers, or with Liver of Sulphur at the rate of 1 oz. to two gallons of water.

A copy of this catalogue will be posted to any applicant, and we shall deem it a favour if customers will pass theirs on to their friends if not required, or send us their names and addresses.

If in doubt leave selection to us.

NOVELTY ROSES, 1931

4/- each; 45/- per dozen: Postage or Freight extra.

The following novelties are, we think, the best of the leading European and American Growers' offerings for 1930. The descriptions are the raisers, considerably condensed, as at the time of going to press plants had not bloomed sufficiently to enable us to verify with certainty their at times flamboyant descriptions, but from April onwards we should be able to give candid criticism of their future promise under Australian climatic conditions, and will be pleased to receive inquiries.

The following varieties already show distinct promise: Barbara Richards, Diane de Broglie, Federico Casas, Lucie Marie, M. Geier, Mdm. Pierre S. Du Pont, and Gloria Mundi (Poly.).

Annette Gravereaux (Per.) (M. Leenders & Co.).—Flower very large, full, and sweetly scented. The colour is fine lemon yellow, shaded orange cadmium. Growth is vigorous and very floriferous, with long upright stems.

Barbara Richards (H.T.) (A. Dickson & Sons).—Colour bright maize yellow with buff reverse. The bud in young flower flushed warm rose which fades slightly as the bloom develops. The bud is large and pointed, developing to a bloom of exhibition size with high-pointed centre. The growth is strong and vigorous.

Climbing Shot Silk (H.T.) (Knight & Sons).—This magnificent climber is an Australian-raised production and is a splendid addition to the climbing class, as the colour fills a long-felt want. The colour is a bright cherry cerise overshot with salmon-orange, flushed rose with yellow base. It is vigorous in growth, blooming freely in Spring and Autumn with bright and glossy foliage, free from mildew. 5/- each.

Diane de Broglie (H.T.) (C. Chambard).—Vigorous and upright branching growth with dark green mildew-proof foliage. Splendid long bud, carried on stiff stem, pure coral with gold splashes. Flowers are large, full and cup shape. Very floriferous, and good perfume.

Druschki Rubra (H.T.) (P. Lambert).—Growth strong, bushy and upright, with dark green foliage, immune from disease. The buds are long and pointed, the flower large and cupped. The colour dark blood red and maroon. Very fragrant.

Erik Hjelm (H.T.) (W. Kordes & Son).—Growth strong and vigorous, with dark green foliage, free from disease. Globular shaped blooms opening well in all weathers. Colour deep rose-pink. Very sweetly scented.

Federico Casas (Per.) (P. Dot).—Large, long, pointed buds, opening to fairly full blooms, borne singly on long stems. The colour is a combination of red and yellow. Growth vigorous and bushy.

Send Your Orders in Early.

- Felberg's Rosa Druschki** (H.P.) (J. Felberg Leclerc).—This novelty is the best seedling from the old favourite "Frau Karl Druschki," and has inherited all the good qualities in growth, foliage and flower. The beautiful large blooms are in form and constitution like Druschki, and are also carried on long, stiff stems. The colour is a wonderful pure brilliant bright pink.
- Frau Mathilde Batz** (H.T.) (J. Felberg Leclerc).—Buds of ideal shape carried on long stems, opening to large, full blooms, pure white with yellow on the base of the large petals. Highly scented. Growth is strong and vigorous and very free flowering.
- Grenadier** (H.T.) (A. Dickson & Son).—The bud is long and pointed, opening to fairly full medium-size bloom. The colour is a brilliant currant red, shaded scarlet, which holds its colour well. The growth is strong and vigorous and free branching habit, and the blooms are sweetly scented.
- Lady Barnby** (H.T.) (A. Dickson & Son).—Bud is long and pointed, opening to large, moderately full bloom of beautiful shape. The colour is a deep glowing pink, shaded rose-red, deepening towards the base of petals. The growth is hardy, forming a compact, bushy plant. Sweetly scented.
- League of Nations** (H.T.) (M. Leenders & Co.).—Flower large, not too full, and fragrant. Color, rosy salmon. Vigorous, compact growth, flowering continuously.
- Lucie Marie** (H.T.) (A. Dickson & Son).—Bud large and pointed, opening to full blooms of good size and form. The color is buttercup yellow ground, heavily washed and veined apricot-orange and shaded salmon-cerise. The growth is vigorous and upright, with free branching habit, and is a profuse continuous bloomer. Sweetly scented.
- Madame Andre de Halloy** (H.T.) (Ketten Bros.).—Flowers are large, very full and cup-shaped, opening well in all weathers. Color orange-cadmium; reverse of petals salmon-pink. Growth vigorous and branchy.
- Madame Henri Pate** (Per.) (J. Pernet Ducher).—A very long bud, opening to moderately sized blooms of a pure golden sulphur yellow color. The foliage is bright and glossy, and growth vigorous.
- Madame Pierre S. Du Pont** (H.T.) (Ch. Mallerin).—Superb long bud, carried on stiff stems, opening to large, full, sweetly scented flowers of good substance and form. The color intense yellow, shaded ochre. Growth vigorous and erect, with foliage immune from disease.
- Max Vogel** (Per.) (M. Leenders).—Flower large, full and perfumed. Color orange-yellow, passing to yellowish-salmon. Compact and vigorous growth.
- Mrs. H. J. Hedley Willis** (H.T.) (Bees Ltd.).—Flowers of moderate size, sweetly scented. The color is a dark crimson, shading to plum black in the centre. Growth vigorous.
- M. Geier** (H.T.) (J. Felberg-Leclerc).—Buds of beautiful form, opening to large full blooms, borne singly on long stems. Color deep, dark velvety carmine, with fiery red deeper in centre. Profuse bloomer. Growth vigorous and erect.
- President Deville** (H.T.) (M. Leenders & Co.).—The flowers are large, full and fragrant; beautiful form. Color, cochineal red, passing to cochineal carmine. The growth is vigorous and free branching, flowering profusely.

Souvenir De Henri Faassen (H.T.) (J. H. Faassen-Hekkens).—The result of a cross between Betty Uprichard and Mrs. George Shawyer. The blooms are large, carried on long, stiff stems, with a colour difficult to describe. Color bright rose with deep orange base, sweetly scented.

POLYANTHAS

Baby Betty (Dwf. Poly.) (The Burbage Nurseries).—This is one of the prettiest Polyantha Roses, the color in bud stage being yellow, with a ruddy tint, opening to a delicate clear rose with pale centre. Growth vigorous and compact, very free flowering and fragrant.

Beauty of New South Wales (Poly.) (Knight).—Bright crimson, with white eye. The flowers are single and carried in very large sprays, and is continuously blooming, at times covering the whole plant with bloom. The growth is as strong as "Orleans."

Dainty Dawn (Poly.) (Knight).—Color variable. The buds are quite purple in color, and as the flowers expand they turn cerise-pink, sometimes mauve-pink. Is very free flowering, blooming for the greater part of the year. Growth is strong as "Orleans."

Gloria Mundi (Dwf. Poly.) (Slidrecht & Co.).—The color is a glowing orange, which does not fade with age. The blooms are borne in clusters and are very full, with closely packed petals, and should be ideal for florists and make-up work. This novelty comes with a great reputation and has received many medals and honours.

Glorious Gerberas for Cut Flowers.

NOVELTY ROSES, 1930

2/6 each; 27/- per dozen: Postage or Freight extra.

Baroness H. von Geyr (H.T.).—Flowers very large and full, pale flesh and vermillion red. Type Mdm. A. Chatenay. Growth vigorous and bushy. Very floriferous.

Betty Sutor (H.T.).—Pale rosy pink on the inside of petals, heavily veined with rose, outside of petals a bright rosy pink; described as an improved Mdm. Abel Chatenay.

Canary (H.T.).—Bud, light golden yellow, lightly flushed cerise, opening to moderately full blooms of a bright clear canary colour. Growth is moderately strong. Very free branching and upright. Free and continuous bloomer. Sweetly scented.

Caledonia (H.T.).—A pure white of splendid size and formation. Growth is strong and upright, with mildew-proof foliage. A good garden and exhibition rose.

Cilly Michel (H.T.).—Color is a combination of capucine brownish red, illuminated with yellow, orange and coral red. Bud is long and pointed and carried on stiff stems opening to large, well-formed, full flowers. Fragrant. Very free flowering. Vigorous grower.

Climbing Golden Emblem (Clb. Per.).—A vigorous climbing sport from the dwarf of the same name. A splendid addition to the yellow climbers.

Climbing Souv. de H. A. Verschuren (H.T.).—So far this variety has proved uncertain as a climber, but this splendid yellow rose should be a welcome addition, if the climbing strain improves.

Daily Mail Scented (H.T.).—Dark, daintily shaped buds, opening to moderately full blooms of a rich deep velvety red with a scarlet sheen; growth is moderate, but the plant is very free flowering. As the name indicates, blooms are sweetly scented.

Dr. Heinrich Lumpe (H.T.).—Color, light rose pink. Large flowers of faultless form, which open well in all weathers, are carried erect on long, stiff stems. Growth is vigorous. Foliage disease-resistant. Fragrant.

Fancy (H.T.).—Color, peach with cherry red markings on a yolk ground. The blooms are of medium size, full, and are carried three to five on strong stiff stems.

Flamingo (H.T.).—Color, bright geranium red paling to glowing rose and cerise. Bud, long and pointed, opening to moderately full flower. Sweetly scented.

Helen Fox (H.T.).—Color, Indian yellow rayed dark red. Flower large, full and perfect form. Growth vigorous and erect.

Joanna Hill (H.T.).—Outer petals clear sulphur yellow, inner petals deeper, showing a decided pink flush, fairly full and well formed. Strong grower.

Jules Gaujard (Per.).—Egg-shaped bud carried on stiff stems opening to a large full bloom of a brilliant carmine color. Growth is strong and vigorous. Free branching, bushy habit. Very free flowering.

If in doubt leave selection to us.

How many Horsepower do you develop?

Probably it feels like a hundred as you push away at the old lawn mower—but actually it takes an infinite amount of effort and perspiration to achieve the same result as an Atco Motor Mower and half a pint of petrol. So why do it yourself or pay a man to do it? You wouldn't take the family for their week-end run in a hand-cart! Note these prices: the 12 inch size would probably do all you require, in which case the cost represents less than 15/- per week for the first year, with many years to follow at running cost only.

ROSES — GENERAL LIST

1/3 each; 13/- per dozen: Postage or Freight extra.

All our Roses are budded on American Noisette and Multiflora Stocks. These have both been found highly satisfactory, a pleasing feature being the suitability of the latter stock for the working of the Pernetiana class, as there does not seem to be the same tendency to die back when worked on this stock.

ABBREVIATIONS USED IN DESCRIBING CLASS OF ROSE.

H.P. (Hybrid Perpetual).—Chiefly Spring blooming, and sometimes in the autumn should good rains follow a dry summer. Very hardy, and can stand a fair amount of frost.

T. (Tea-scented).—Fairly hardy, but will not stand as much frost as H.P.

H.T. (Hybrid Tea).—Class between H.P. and T., but so intercrossed that it is at times hard to classify correctly. Everblooming and hardy.

PER. (Pernetiana).—Mostly in brilliant colors. Strong growers in dry inland and cold climates, but inclined to die back in the warm, humid districts.

* The varieties marked with an asterisk are specially recommended by the Nurserymen's Association of New South Wales as being most suited for general utility purposes.

***Angele Pernet** (Per.).—Vivid orange yellow, shaded fiery red and reddish apricot; outside of petals golden yellow; blooms semi-double. Moderate grower.

Aspirant Marcel Rouyer (H.T.).—Fairly full, shapely flowers of a deep apricot color, tinted with salmon. Vigorous grower.

America (H.T.).—Long pointed buds, opening to large blooms of perfect form; soft rose pink and very fragrant. Moderate grower.

Alexander Hill Gray (T.).—Sulphur yellow. Very full blooms, perfect shape, very free flowering. Fragrant, good for garden and exhibition. Strong grower.

Antoine Rivoire (H.T.).—Large camellia shaped blooms of a rosy flesh color, freely produced. Good for garden and exhibition. Strong grower.

Betty (H.P.).—Beautiful long pointed buds opening to somewhat loose blooms of a pale flesh color with reverse of petals salmon rose. Mildew proof and a good grower.

***Betty Uprichard** (H.T.).—Inner face of petals delicate salmon pink, reverse of petals glowing carmine, tinted orange. Blooms large, semi double and sweetly scented. Growth vigorous.

Cecil (Per.).—Golden yellow with bright yellow stamens. The single blooms are produced in clusters and constantly throughout a prolonged flowering period. Bushy and branching habit and a vigorous grower.

***Chas. P. Kilham** (H.T.).—Blooms large, of fine shape. Color brilliant orange orient red, suffused with glowing scarlet; when open, fades to brilliant Lincoln red; lasts well when cut. Very free; mildew-proof foliage. Vigorous.

Chateau de Clos Vougot (H.T.).—Rich scarlet crimson, shaded velvety black; blooms of good form and very full. Moderate grower.

Cherry (H.T.).—Color, sunflower yellow on outside of petals, and on inner side bright rose, heavily veined deeper rose. Bloom is of medium size, fairly full and of good shape. Moderate growth.

Send Your Orders in Early.

SEARL'S LIMITED, 104 King Street, Sydney.

- Columbia (H.T.).**—Large, full flowers of a rich, deep pink, which holds its color well. The growth is strong and vigorous, producing blooms freely throughout the season.
- Comtesse de Castillija (Per.).**—Large, perfectly formed and perfumed blooms of unique colorings, being orange-flamed vermillion, passing to golden coral as the flower expands. Vigorous and mildew-proof.
- Comtesse de Cayla (T.).**—Medium size, semi-double blooms of a beautiful shade of nasturtium red, tinted carmine and copper. Very free flowering and a strong grower.
- Comtesse La Barthe (T.).**—Rosy flesh, not full but always in bloom. Strong grower.
- Countess of Gosford (H.T.).**—Large, loose blooms of a pale salmon pink color, very free blooming but mildews badly. Vigorous grower.
- C. V. Haworth (H.T.).**—Rich scarlet crimson blooms, becoming deeper as the season advances; semi-double. Moderate grower.
- Cynthia Forde (H.T.).**—Deep brilliant rose-pink, back of petals lighter; large, well-formed flowers. Vigorous grower.
- Dr. Hawkesworth (H.T.).**—Rich crimson shading to deep maroon. Medium sized blooms of good shape carried on long stems. Very free flowering and branching habit. Vigorous grower and sweetly scented. Similar to Hoosier Beauty.
- Dorina Neave (H.T.).**—Large, full, beautifully formed flowers; color silvery pink, fragrant and free blooming. Vigorous grower.
- Dainty Bess (H.T.).**—A beautiful single rose, a cross between Ophelia and K. of K. Color, salmon-pink with a striking centre of crimson and gold stamens. The color fades somewhat during the summer, but becomes richer as the season advances. Moderate to strong grower.
- *Dame Edith Helen (H.T.).**—Color glowing pink, a self throughout from the time the buds open till the petals fall; very large and full; perfect form, and opens well in all weathers. It possesses the true old rose scent in a very high degree. Free bloomer. Moderate grower. A rather uncertain grower in some districts, but I have received glowing reports from the drier inland areas. A glorious rose, and is worth a trial anywhere.
- Duchess of Sutherland (H.T.).**—Delicate warm rose-pink; large, sweetly-scented flowers. Valuable for garden or exhibition. Strong grower.
- *Duchess of Wellington (H.T.).**—Extra long buds, saffron yellow, flushed crimson, opening to large, fairly full blooms. Fragrant, and a strong grower.
- Earl Haig (H.T.).**—Large, globular, somewhat flat blooms, reddish crimson in color. Scented; strong grower.
- Edith Clarke (H.T.).**—Full, medium sized blooms of a dazzling red. Very sweetly scented. Moderate grower.
- Edith Nellie Perkins (H.T.).**—The outside of petals is a light Orient red, heavily shaded cerise at top and orange at base; the inner face is salmon-pink, merging into orange-salmon. The blooms are moderately full, well shaped and sweetly scented. Growth is vigorous.
- Elegante (H.T.).**—Creamy yellow bloom of good form, scented. Free flowering, vigorous growth; of spreading habit. Recommended.

Sydney's Leading Florists for 75 Years.

SEARL'S LIMITED, 104 King Street, Sydney.

- ***Ethel Somerset** (H.T.).—Coral pink, edge of petals deep pink. Blooms large, of good form and substance, sweetly scented; very free blooming. Vigorous grower.
- ***Etoile de Hollande** (H.T.).—Dark red buds opening to non-fading blooms of a rich bright red color. The growth is strong and erect with free branching habit. Blooms are inclined to be loose in the Spring, but later in the season become much fuller; very sweetly scented.
- Etoile de France** (H.T.).—Color velvety crimson; centre vivid cerise red. Blooms large but open badly at times. Moderate grower.
- Everest** (H.T.).—An enormous rose of good form. Color, white, suffused with cream; a vigorous grower; suitable for exhibition.
- Feu Joseph Looymans** (Per.).—Delightfully shaped buds of a vivid apricot, opening to large, fairly full flowers of a deep yellow color. The growth is strong and bushy, and blooms are produced freely.
- ***Fontanelle** (H.T.).—A large yellow rose with immense petals and beautifully formed flowers carried on stiff stems. Sweetly scented. Continuous bloomer and a strong grower. Good for garden and exhibition.
- ***Frau Karl Druschki** (H.P.).—Large well-formed flowers of the purest white color; very strong grower, and may be also grown as a climber. An old favourite.
- Francis Gaunt** (H.T.).—Large, fairly full flowers of good shape. Color deep apricot. Vigorous grower.
- Francis Scott Key** (H.T.).—Color cherry red. Blooms large, full and well-formed. A useful exhibition rose. Vigorous grower.
- Frank Reader** (H.T.).—Long buds opening to large shapely blooms carried on long stems. Color, creamy yellow, centre golden apricot. Fragrant. Good garden and exhibition rose.
- Frank Neave** (H.T.).—Nicely shaped buds opening to medium-sized, fairly full flowers. Rich mustard yellow. Very free flowering. Moderate to vigorous grower.
- Gaiety** (H.T.).—Beautifully shaped buds opening to large semi-double blooms which are carried on long stems. The color is a brilliant shade of orange flushed with vermilion and old rose. The growth is vigorous and branching. Free blooming. A splendid decorative and garden rose.
- General Superior Jansen** (H.T.).—Blooms large, of good form; brilliant carmine in color, very free blooming, but with a tendency to burn at times. Vigorous grower.
- ***General McArthur** (H.T.).—Brilliant crimson flowers of good form, petals round, of good substance. Growth vigorous. Free blooming and sweetly scented.
- George Arends** (H.P.).—Large blooms, nice clear pink color; sweetly scented and free blooming; vigorous grower.
- George Dickson** (H.T.).—Large blooms, rather flat, color velvety crimson with scarlet reflexed tips, sweetly scented. Strong grower. Blooms well in Spring and again in Autumn, should the season be favourable.
- George Schwartz** (T.).—Medium size blooms, beautiful clear yellow; free flowering. Growth moderate.
- Goldmine** (H.T.).—Golden yellow with orange centre. Blooms of medium size; very free flowering. Moderate growth.
- Golden Dawn** (H.T.).—A vigorous growing Australian raised rose; a seedling from "Elegante" x "Ethel Somerset." The buds are rich sunflower yellow heavily flushed with deep old rose, the color fading a little as the bloom ages. The growth is vigorous and of splendid branching habit, and is wonderfully free blooming; sweetly scented. A splendid addition to the yellow class and should be in every garden.

Glorious Gerberas for Cut Flowers.

SEARL'S LIMITED, 104 King Street, Sydney.

- Golden Emblem (Per.).—Reddish golden buds opening to beautiful blooms of a bright cadmium yellow. Moderate growth. Along Coast, best grown as a standard.
- Golden Gleam (H.T.).—Rich yellow flushed carmine buds opening to beautiful buttercup yellow blooms of medium size. Very free flowering. Moderate grower.
- *Golden Ophelia (H.T.).—Medium sized blooms of perfect form; color, golden yellow; very free flowering, and one of the best garden yellows. Vigorous and free branching habit.
- Gruss an Teplitz (H.T.).—Medium cup-shaped blooms of bright crimson color, very free flowering. Vigorous grower.
- *Gustave Grunerwald (H.T.).—Bright carmine-pink, large, full and cup-shaped; vigorous grower.
- Gwen Nash (H.T.).—Large somewhat loose blooms; color, cyclamen-pink; very free flowering. Vigorous grower.
- *Hadley (H.T.).—Large beautifully formed flowers, full and sweetly scented; color, deep velvety crimson. Vigorous grower. The old favourite red.
- Hawlmarm Crimson (H.T.).—Medium size semi-double blooms of a dark blackish crimson color. Poor grower.
- Hilda (H.T.).—Flowers are large, very full and globular in form, lasting well when cut. The color is a bright carmine, inner petals light pink. Growth vigorous and upright.
- E. G. Hill (H.T.).—Dazzling scarlet, shading to deeper purer red as the bloom develops. The blooms are full and sweetly scented; the growth strong and vigorous, with free branching and blooming habit.
- *Hoosier Beauty (H.T.).—Deep velvety red, veined black; keeps its color well. One of the best for garden purposes. Very free flowering and sweetly scented. Strong grower.
- Hugo Roller (T.).—Rich lemon yellow; petals edged and suffused with crimson. Flowers medium size, of good shape, and freely produced. Moderate grower.
- Imperial Potentate (H.T.).—Splendidly shaped buds opening to large double blooms. Color glistening rose-pink, with silvery suffusion at base of petals. Sweetly scented.
- *Irish Elegance (T.).—Beautiful orange buds opening to large single blooms of a coppery orange color, fading a little as the bloom develops. Vigorous grower.
- *Irish Fireflame (T.).—A single rose somewhat similar to Irish Elegance, but the color is more intense. Vigorous grower.
- Isobel (Per.).—Splendid single rose of dainty coloring, carmine flushed with orange-scarlet; moderately strong grower.
- Johanniszauber (H.T.).—Medium-sized full blooms, lasting well when cut. Color, dark non-fading red; growth fairly vigorous and branching.
- John C. M. Mensing (H.T.).—Color a deep bright rose; habit and characteristics same as the parent, Ophelia, from which it sported.
- *Jonkheer J. L. Mock (H.T.).—Color, carmine on reverse petals, inside silvery-pink. Blooms large and of perfect form and substance carried on long stiff stems; good for cutting. Vigorous grower.
- Julien Potin (Per.).—The most gorgeous and brilliant yellow rose yet introduced; a rich golden yellow that grows deeper and more intense as the flower matures. The growth is upright, fairly vigorous, with bronzy green foliage. Very free flowering and sweetly scented.
- *K. A. Victoria (H.T.).—Large full blooms of perfect form, color white, shaded cream. Vigorous grower.

If in doubt leave selection to us.

- *Konigin Carola (H.T.).—Satiny rose, reverse of petals silvery white, buds long and pointed. Strong grower. Exhibition rose.
- Konigen Luise (H.T.).—A seedling from Frau K. Druschki x Sunburst, with large, full, perfectly formed flowers. Color, white. Growth, strong and branching and very floriferous. Good show rose.
- *K. of K. (H.T.).—Large semi-double blooms; vivid crimson scarlet; lasting well when cut. Very free flowering. Vigorous grower.
- *Lady Helen Maglona (H.T.).—Medium sized, rather flat blooms. Color, bright crimson red, with blackish markings, which lightens with age to scarlet red. Sweetly scented. Moderate grower.
- Lady Margaret Stewart (H.T.).—Deep sunflower yellow, veined and splashed orange scarlet, reverse deeply marked with carmine; sweet perfume. Poor grower.
- Lady Worthington Evans (H.T.).—Nicely shaped buds opening to loose blooms of a glowing blackish crimson; very free flowering. Moderate grower.
- *Lady Ashtown (H.T.).—Blooms are large and full, with high-pointed centre; color, deep rose shading to yellow at base of petals. Vigorous grower. An excellent garden and show rose.
- *Lady Hillington (T.).—Beautiful, long, pointed, rich apricot buds opening to fairly full blooms of a deep yellow color. Vigorous grower. One of the best garden yellows.
- Lady Maureen Stewart (H.T.).—Medium sized, velvety scarlet blooms, rather flat. Mildews badly. Moderate grower.
- *Laurent Carle (H.T.).—Large full blooms; color, brilliant velvety carmine, very free flowering and fragrant. Vigorous grower.
- Lady Craig (H.T.).—Full flowers of good size and form; a clear yellow with deeper centre, scented. Vigorous grower.
- Lady F. Stronge (H.T.).—Color, reddish prawn shading to old rose, with yellow at base of petals. Blooms large, full, and of good shape; very free flowering. Vigorous grower.
- *Lady Pirrie (H.T.).—Medium sized, fairly full blooms. Coppery salmon, inside of petals yellow and fawn; very free flowering. Vigorous grower.
- La France (H.T.).—Pale rose, reverse of petals deeper, very sweetly scented. Moderate grower. Should be pruned lightly.
- *La Tosca (H.T.).—Soft pink, tinted rosy white, large and full; very free flowering. Vigorous grower.
- Lady Roberts (T.).—Reddish apricot, the base of the petals coppery red. Medium sized blooms; full and of good shape. Good grower.
- Li Bures (Per.).—The bud is long, carried on stiff stems of a novel dark red color, opening to a moderately full flower of a pretty combination of colors; red, rose, and yellow. Free and continuous bloomer. Sweetly scented. Moderately strong grower.
- Lilian Moore (H.T.).—Medium sized rose of a deep Indian yellow color. Moderate grower.
- *Lord Castlereagh (H.T.).—Beautiful dark buds opening to semi-double blooms of a deep velvety crimson. The growth is strong and free branching; very free flowering. Fragrant. A distinct improvement on Hawlmark Crimson.
- *Lord Charlemont (H.T.).—Crimson deepening to carmine crimson, buds long and pointed; flowers full. Sweetly scented. Moderate grower.
- Los Angeles (Per.).—Flame-pink, shaded coral and gold. Blooms large and fairly full; growth, moderate to vigorous.
- Louise Crette (H.P.).—Very large and full blooms of perfect form. White with creamy centre; good show rose. Very vigorous.

Send Your Orders in Early.

SEARL'S LIMITED, 104 King Street, Sydney.

- Lorraine Lee.**—Semi-double blooms of medium size. Buds salmon rose becoming paler as the bloom opens; a wonderfully free flowering decorative. A moderate grower.
- ***Mdm. Abel Chatenay (H.T.).**—Rosy pink, shaded salmon; base of petals deeper. Blooms large, full and well formed; very free flowering. Vigorous grower.
- ***Mdm. Butterfly (H.T.).**—Pale pink, shaded orange-apricot. Blooms moderately full and of good shape. A sport from Ophelia, but much richer in color, sweetly scented. Growth, moderate to vigorous.
- Mdm. Caroline Testout (H.T.).**—Bright fresh rose, fairly full globular blooms of large size. Very strong grower.
- Mdm. Constant Soupert (T.).**—Large, well-formed blooms; golden yellow shaded pink. Moderate grower. A good show rose.
- Mdm. Edouard Herriot (Per.).**—Medium sized, beautifully formed blooms of a rich coral red, passing to prawn red; very free flowering. Moderate grower. Recommend planting a climber and keep it as a bush.
- ***Mdm. Jules Grolez (H.T.).**—Well-formed blooms of a brilliant china rose; very free flowering. Moderate grower.
- ***Mdm. Jules Bouche (H.T.).**—Color, creamy white, flushed pale pink; fairly full flowers. Vigorous grower. A good garden rose.
- ***Mdm. Segond Weber (H.T.).**—Clear, bright salmon rose. Long perfect buds, opening to large handsome blooms with fine stiff petals, lasting well when cut. Moderate grower.
- ***Maman Cochet (T.).**—Large, very full blooms of fine form; color, rose shaded salmon. Very free flowering and mildew proof. Vigorous grower.
- Margaret Dickson Hamill (H.T.).**—The color is a deep golden yellow, with a tendency to fade during the hot weather. A fine vigorous growing rose producing full globular blooms.
- ***Margaret McGredy (H.T.).**—The color is orange-scarlet, fading slightly when the flowers are open. Blooms are large, full, and well formed, borne freely and continuously throughout the season. The foliage is healthy, and the growth vigorous and bushy. A good garden rose.
- Mari Dot (Per.).**—Color, cadmium yellow, suffused dark red, passing to rosy salmon yellow. The flowers are large, full and egg-shaped, and are sweetly scented. Moderate grower.
- Marion Cran (H.T.).**—Deep buttercup yellow, margined and flushed cerise and rosy scarlet. Well-formed flower of medium size. Moderate to strong grower. Bushy habit.
- Marie van Houtte (T.).**—Large, full blooms; color, cream, edged rose and peach. Very free and vigorous.
- May Wettren (H.T.).**—Color, deep rose, paling somewhat as the bloom develops. Long buds opening to moderately full blooms with immense petals. Fragrant. Vigorous grower.
- ***Merv. G. A. van Rossem (H.T.).**—Medium flowers carried on stiff stems, full and beautifully formed. The flowers are heavily flamed and shaded dark orange and apricot on a dark golden yellow ground. Growth is vigorous and upright. A striking color combination.
- Mildred Grant (H.T.).**—Large beautifully formed flowers; silvery white suffused blush. Moderate grower. For exhibition only.
- ***Miss Wilmott (H.T.).**—Blooms are large, well formed, and fairly full. Color, sulphur-cream, with a deeper flush at centre. Strong grower. Good show rose.
- Mrs. Aaron Ward (H.T.).**—Blooms medium size, but full. Indian yellow with deeper centre; free flowering. Moderate grower.

Searls Plants are hardy and well grown.

SEARL'S LIMITED, 104 King Street, Sydney.

- Mrs. A. R. Barraclough (H.T.).—Color bright sparkling carmine-pink, shading to yellow at base. The color does not fade, but seems to become brighter as the flower ages. The flowers are full, of good size, and perfect form. Growth is fairly vigorous. Sweetly scented. Good show rose.
- *Mrs. A. R. Waddell (H.T.).—Long buds of a rich apricot with a reddish tint, opening to rather loose blooms somewhat paler in color. Very free flowering. Vigorous grower.
- Mrs. Beatty (H.T.).—Deep creamy yellow. The buds are of beautiful shape, opening to moderately full blooms. Sweetly scented. Moderate grower.
- *Mrs. Beckwith (Per.).—Buttercup yellow, lighter on edges of petals. Blooms fairly full, medium size, and nicely shaped. Moderate grower.
- *Mrs. Bryce Allen (H.T.).—Carmine-rose, full globular blooms, sweetly scented; fairly free blooming. Strong grower.
- Mrs. Charles Lamplough (H.T.).—Very large blooms, full and excellently shaped, suitable for garden or exhibition. Color, soft lemon yellow. Strong grower.
- *Mrs. Charles J. Bell (H.T.).—Color, delicate shell-pink. A sport from Radiance, possessing all the good qualities of the parent. Sweetly scented.
- *Mrs. Dunlop Best (H.T.).—Reddish apricot. Blooms moderately full, free flowering. A good garden rose.
- Mrs. E. Pembroke Thom (H.T.).—Long buds of good shape, opening into medium sized, well-formed, full flowers of a deep canary yellow. Very free flowering. Vigorous grower.
- *Mrs. George Shawyer (H.T.).—Very large, beautifully formed flowers of a bright clear rose color. The blooms are very full, good for garden and exhibition. Strong grower, but a tendency to mildew.
- *Mrs. Harold Brocklebank (H.T.).—Creamy white with deeper centre, outer petals flushed salmon rose. A vigorous growing and free blooming rose; suitable for show or garden.
- Mrs. H. R. Darlington (H.T.).—Creamy white, sometimes yellow in centre when opened out. A magnificent bloom of great size and excellent shape. Growth moderate to vigorous. Good show rose.
- *Mrs. Herbert Stevens (T.).—Beautiful long pointed buds opening to moderately full blooms, which open rather quickly. Color, white. A very free flowering and vigorous grower. One of the best garden whites.
- *Mrs. Henry Winnett (H.T.).—A beautiful double red rose, not quite as dark as Hadley. Very free flowering and a good grower; mildew-proof foliage. Sweetly scented. A good exhibition and garden variety, but needs time to establish before giving the best results.
- Mrs. Lovell Swisher (H.T.).—Shapely blooms of a lilac-rose color, shading to bright yellow at base. A very free flowering and vigorous grower.
- *Mrs. Mackellar (H.T.).—Color, citron yellow, shaded primrose. The blooms are large, fairly full, and perfectly formed. The petals reflex, giving the bloom a fine appearance. Vigorous grower. A good exhibition rose.

Glorious Gerberas for Cut Flowers.

- Mrs. T. Smith (H.T.).**—Glowing cerise. Large fairly full blooms of good shape; a very free and vigorous grower. Scented.
- Mrs. William C. Egan (H.T.).**—Large, well-formed blooms of a light soft pink color. Flowers freely produced. Growth moderate to vigorous.
- Mrs. W. E. Lenon (H.T.).**—Large, long, pointed buds, opening to moderately full, sweetly scented flowers of a rich carmine-crimson color. Vigorous grower and continuous bloomer.
- Molly Sharman Crawford (H.T.).**—Delicate, greenish-white. Blooms of good size. Very free flowering, and lasting well when cut. Strong grower.
- My Maryland (H.T.).**—A rich salmon pink. Blooms large, full and nicely shaped; a free blooming and vigorous rose suitable for garden or exhibition.
- Norman Lambert (H.T.).**—Outside of petals rich buttercup yellow, inside of petals salmon orange suffused bronzy yellow. Large, fairly full blooms of perfect form. Sweetly scented. Very free blooming and a vigorous grower.
- *Oliver Mee (H.T.).**—Deep salmon flushed clear fawn. The buds are very long and pointed, opening to beautifully shaped blooms of the largest size. A very free flowering and vigorous variety. Recommended.
- Ophelia (H.T.).**—Salmon flesh, shaded yellow and rose. Blooms fairly full and sweetly scented. Fairly vigorous grower.
- Papa Gontier (T.).**—Long buds opening to large semi-double blooms of a rosy cerise color. Strong grower. A good winter flowerer.
- *Padre (H.T.).**—Coppery scarlet in the buds, opening to coppery salmon and salmon pink. The semi-double blooms are large and carried on long stems; very free flowering and vigorous.
- Penelope (T.).**—Medium sized blooms with a high pointed centre. Outer petals red, centre creamy white. Mildews badly. Poor grower.
- Perle des Jardins (T.).**—Straw color, centre orange yellow. The blooms are large and full; very free flowering. Moderate grower.
- Phoebe (H.T.).**—Color, cream with deep cream centre. Blooms are full and of good form, carried on long stems. Growth upright and fairly vigorous.
- Prince Camille de Rohan (H.P.).**—Large blooms of good shape. Color, dark maroon shaded velvety black. Vigorous grower. One of the few H.P.'s worth growing.
- *Radiance (H.T.).**—Large, fairly full blooms, globular in form. Color, clear rose, reverse of petals carmine. Very free flowering and fragrant. The most popular pink for garden and cut flower work. Vigorous grower.
- Rapture (H.T.).**—A sport of Mdm. Butterfly. Flower of medium size, borne singly on long stems. Color, deep pink. Like parent in habit of growth, but stronger.
- Red Letter Day (H.T.).**—Brilliant scarlet-crimson; a splendid semi-double rose constantly in bloom. Very free branching and a vigorous grower.

If in doubt leave selection to us.

- ***Red Radiance** (H.T.).—Bright pure red. Growth and characteristics same as in the parent, Radiance, from which it sported. Delightfully fragrant.
- ***Rev. F. Page Roberts** (Per.).—Blossoms large, full and perfect in shape. Deep golden yellow, overlaid and veined with coppery orange on the reverse of petals. Fragrant. Growth is fairly vigorous and mildew proof.
- ***Richard E. West** (H.T.).—Cadmium yellow, paler on reflex. Blossoms of perfect form, large and fairly full, with high pointed centre. Fragrant. Very free flowering and vigorous grower.
- Roger Lamelin** (H.P.).—Scarlet red with a clear well-defined margin of white round the edges, quite distinct. Vigorous grower.
- Rosa Indica**.—This variety is also known under the names of Cramoisi Superieur, Lady Brisbane, and Crimson China. Its habit of growth is compact and bushy and is continuously in bloom making it an ideal variety for hedges and borders. The color is bright red.
- ***Roselandia** (H.T.).—A sport from Golden Ophelia; the blossoms being larger and deeper in color with reverse of outside petals lightly marked with carmine. The blossoms are of perfect form and borne freely. Fragrant. Vigorous grower.
- Rose Berkeley** (H.T.).—The color is a deep rosy salmon pink suffused with orange with yellow base. The blossoms are large, full, and beautifully formed, being suitable for exhibition or garden. The growth is vigorous, bushy, and branching. A splendid rose.
- Rose Hill** (H.T.).—A sport from Columbia, sent out as an improvement on the old favourite and is showing up very well. Worth a trial.
- ***Rose Marie** (H.T.).—Beautifully shaped buds opening to large fairly full blossoms of good shape. Clear rose pink. The blossoms are borne freely throughout the season, making it an ideal bedding rose. Delightfully fragrant. Strong grower.
- ***Sensation** (H.T.).—Rich velvety crimson, shaded dark crimson, with a tendency to blue as the bloom ages. The blossoms are large, full and of fine form, very free and fragrant. Vigorous grower.
- ***Shot Silk** (H.T.).—Bright cherry-cerise overshot with salmon-orange, flushed rose, with yellow base. The blossoms are of medium size, fairly full and sweetly scented. The growth is moderate to vigorous with beautiful glossy green foliage. Can recommend for a medium height hedge.
- Souv. de Chas. Gouverneur** (H.T.).—Large, beautifully formed flowers carried on stiff stems. Color, flesh, centre salmon orange. Vigorous bushy growth, and very floriferous. Sweetly scented.
- ***Souv. de Claudius Pernet** (Per.).—Sunflower yellow, deeper in centre. Large, full, beautifully formed flowers, carried on stiff stems. Growth is moderate to vigorous, and immune from all diseases.
- ***Souv. de Georges Pernet** (Per.).—Large, globular blossoms, carried on stiff stems. Beautiful Orient red, shaded with yellow. Growth is vigorous and branching.
- ***Souv. de H. A. Verschuren** (H.T.).—Color, cadmium yellow with deeper centre. Blossoms are large, full, and perfectly formed, carried on stiff stems. Sweetly perfumed. A free blooming and vigorous rose, suitable for garden and exhibition.
- Souvenir de Maria Zayas** (H.T.).—Blossoms are large and of fine form, suitable for garden or exhibition. The color is a deep carmine, which is somewhat hard at times; vigorous grower.

Send Your Orders in Early.

- Souv. de Stella Gray (T.).**—Delightful little buds opening to medium sized blooms. The color is very attractive—orange splashed apricot, copper, and salmon. Very free flowering. Moderate grower.
- Souv. de Therese Levet (T.).**—Medium-sized, full blooms of splendid form. Deep crimson shaded maroon. Very free and vigorous.
- *Souv. de Mdm. Bouillet (H.T.).**—Color, deep cadmium yellow. Beautiful long bud, opening to fairly full bloom. The growth is vigorous and spreading. A good garden yellow.
- Star of Queensland (H.T.).**—Dark crimson. Large, fairly full blooms. Sweetly scented. Very free flowering. Vigorous grower.
- *Sunburst (H.T.).**—Flowers large and fairly full, yellow with deep orange centre. Long pointed buds. A very free flowering and vigorous grower.
- *Sunny South (H.T.).**—A decorative rose of vigorous growth, handsome foliage, strong constitution and good habit. The semi-double blooms are of beautiful coloring and form, being a lovely pink flushed with carmine.
- Sunstar (H.T.).**—Pretty buds opening to medium-size, semi-double blooms. Color, orange edged with veined crimson and vermillion. Very free flowering. Moderate to vigorous grower.
- Talisman (H.T.).**—A seedling of Ophelia x Souv. de C. Pernet. Brilliantly colored buds of rich shadings and blendings of pure scarlet and gold, which fade out to rose and yellow as the bloom opens. The growth is vigorous and erect. Sweetly scented. A wonderful novelty.
- The Bride (T.).**—White flushed with pink. Blooms of good form. Moderate grower.
- *Una Wallace (H.T.).**—Large blooms of beautiful formation and splendid substance. Color, soft cherry rose without shading. Delightfully perfumed and a vigorous grower. Good for garden and exhibition.
- Warrior (H.T.).**—Buds blood-red, opening to large semi-double blooms of a bright crimson color. Very free flowering. Vigorous grower. Recommended as a winter flowerer.
- *White Ensign (H.T.).**—White flushed cream. The blooms are medium sized and of good shape, lasting well when cut; very free flowering. Vigorous grower.
- *White Maman Cochet (T.).**—Large, very full blooms of good form. Creamy white tinted pink. A very free flowering and vigorous grower.
- William Shean (H.T.).**—Extra large blooms of good form suitable for exhibition. Color, deep pink. Moderate grower.
- *William F. Dreer (Per.).**—Golden yellow, flushed deep peach. Large splendidly formed full blooms, carried on long stems. Growth moderate to vigorous. A good exhibition rose.
- Yves Druhin (H.T.).**—Medium size, fairly full blooms. Color, dark velvety red; sweetly perfumed. The growth is strong and vigorous with free branching habit. Very free flowering. The darkest H.T. in cultivation.

MOSS ROSES

1/3 each; 13/- dozen: Postage or Freight extra.

These Roses thrive best in the colder districts; about Sydney they bloom in the Spring only. They are beautifully mossed, and very attractive.

Crimson Globe.—Crimson; scented.

White Bath.—Pure White.

Zenobia.—Pink.

MINIATURE ROSES

1/3 each; 13/- dozen: Postage or Freight extra.

This section is devoted to the perfectly shaped miniature roses of the Cecile Brunner type, which are eminently suitable for posies, buttonholes, and other floral work. They are not so suitable for mass garden work as the previous list, but are worth a place in any garden. They are of low bushy habit of growth and do not exceed 2 feet, with the exception of Cecile Brunner. The original dwarf of this variety is such a poor grower that it is usually found preferable to plant the climbing variety, which makes a dense bush, growing 5 to 6 feet high, but it can be kept down lower if required, say, 3 to 4 feet, by a vigorous application of the secateurs.

Canarienvogel.—Coppery yellow, flushed with carmine. Pretty buds. Dwarf.

***Cecile Brunner.**—Salmon pink with coppery centre. A strong vigorous grower, blooming profusely all the year round, and often producing sprays with 70 to 80 flowers on a branch. Tall.

***George Elger.**—Golden coppery yellow passing to clear yellow when open. Dwarf.

Tiptop.—A perfect rose in miniature; color, yellow, overlaid with carmine. Dwarf.

COOPER'S

ARSINETTE

The world's standard Arsenate of Lead. Kills all chewing grubs, caterpillars, leaf-eating beetles, etc. 1lb. makes 40 gallons.

In packets, 1/-, 1/6 and 2/6.
(Plus rate of Sales Tax.)

Glorious Gerberas for Cut Flowers.

POLYANTHA ROSES

1/3 each; 13/- dozen: Postage or Freight Extra.

This type has advanced rapidly in favour, being eminently suited for planting in masses, and for borders and low hedges. Most of the varieties bloom eight to nine months in the year.

Mistakes are apt to be made by clients when planting through not knowing the height of growth. As a guide we are indicating each variety as either tall or dwarf; the former grow to three or four feet, and the latter eighteen inches to two feet. We do not recommend planting mixed varieties in a border, although a mixed bed produces a good effect.

Throughout the growing season the plants should be gone over regularly and the heads of spent blooms removed. As Polyanthas do not drop their petals like other classes of roses, this is essential if plants are to keep their fresh appearance and this will also force plants into new growth and more blooms.

***Alice Amos.**—Color, rosy cerise with white eye, resembling a dwarf American Pillar. Flowers are single, borne in large trusses. Tall.

***Ellen Poulsen.**—Bright pink. Blooms large, semi-double and borne very freely. This variety is particularly valuable for its blooming qualities, as it comes into bloom early and continues right into the winter. Tall.

***Goldlachs.**—A brilliant, intense orange-red. A sport of Ideal, with a habit of growth similar to Orleans. A delightful color, which should become popular when known. Dwarf.

***Ideal.**—Scarlet-crimson. A sport from Miss Edith Cavell, with similar habit of growth. Burns slightly during the hot weather, but is, to date, the best dark red Polyantha. Dwarf.

Katherine Zeimet.—Medium-sized, semi-double blooms, borne in clusters. Color, pure white. Scented. Tall.

Lady Reading.—This variety may be termed a sister to Ellen Poulsen, as it has the same habit of growth and characteristics, the only difference being the color, a bright red. Recommended. Tall.

Locarno (1929).—A deep orange-scarlet sport of Orleans. Dwarf.

Mdlle. Francisqu  Favre.—Color, bright crimson with white centre. Blooms single, borne in clusters. Dwarf.

Maman Turbat.—China rose, shaded pink. A good variety. Dwarf.

***Miss Edith Cavell.**—A scarlet-crimson sport from Orleans, possessing all the old favorite's characteristics. Dwarf.

Orange Queen.—Orange salmon, but a tendency to fade. Dwarf.

***Orleans Rose.**—Carmine pink with white centre. The old favorite. Dwarf.

***Rufus.**—Intense bright crimson, holding its color well and bearing flowers in large trusses. Dwarf.

***Salmon Spray.**—Color, delicate salmon pink with carmine on reverse of petals. Flowers are semi-double, borne in sprays of from five to twenty, lasting for days in water when cut. Tall.

Yvonne Rabier.—White, semi-double flowers, strongly perfumed. Tall.

If in doubt leave selection to us.

CLIMBING ROSES

(Large Flowered.)

1/3 each; 13/- dozen: Postage or Freight Extra.

Australian Beauty (H.T.).—Dark velvety crimson. A vigorous grower with good foliage. Blooms of fine form and sweetly scented.

Bardou Job (H.T.).—Bright, velvety crimson. Large semi-single blooms. Sweetly scented. Vigorous grower.

***Blackboy (H.T.).**—Deep blackish crimson, large semi-double, sweetly scented blooms. A splendid climber, being particularly strong growing and a very free bloomer.

Clb. Belle Siebrecht (H.T.).—Large, fairly full blooms, deep pink; very fine shape. Pillar rose.

***Clb. Columbia (H.T.).**—A climbing sport from the popular dwarf, which should become a favorite.

Clb. Comtesse la Barthe (T.).—A strong climbing sport of the well-known favorite. A free blooming pink climber.

Clb. Devoniensis (T.).—Creamy white with blush centre; fine shape. Vigorous grower.

***Clb. General MacArthur (H.T.).**—This climbing sport of the old favorite dwarf should be a welcome addition to the red climbers.

Clb. George Schwartz (T.).—A vigorous climbing sport of the beautiful dwarf; deep yellow blooms and glossy green foliage.

***Clb. Golden Ophelia (H.T.).**—A climbing sport of the yellow rose, Golden Ophelia. The growth is vigorous and flowers continuously throughout the season.

Climbing Hadley (H.T.).—A vigorous climbing sport of the old favorite, and a splendid addition to the red climbing class.

Clb. Hoosier Beauty (H.T.).—A splendid climbing sport of the well-known dark red. Sweetly scented. Vigorous grower.

***Clb. J. J. L. Mock (H.T.).**—A splendid climbing sport of the dwarf variety, particularly valuable to exhibitors.

***Clb. K. A. Victoria (H.T.).**—A rather uncertain climbing sport of the popular white dwarf, as in some situations it is particularly strong and in others only moderate in growth. Very free blooming.

***Clb. Lady Hillingdon (T.).**—A vigorous climbing sport from the well-known dwarf variety. Long buds of a deep orange yellow color.

***Clb. Laurent Carle (H.T.).**—A climbing sport of the well-known popular red of the same name. A very free flowering and vigorous grower with sweetly scented blooms.

***Clb. Los Angeles (Per.).**—A vigorous climbing sport of the dwarf variety. Color, flame pink shaded coral and gold. Beautifully shaped blooms.

***Clb. Mdm. Abel Chatenay (H.T.).**—A climbing sport of the well-known dwarf. A free blooming pink, which should be planted more freely.

Send Your Orders in Early.

- Cib. Mdm. Butterfly (H.T.).**—A vigorous climbing sport from the dwarf, and considered to be improved in color, petalage, and fragrance. Color, pale pink, shaded orange-apricot.
- Cib. Mdm. Edouard Herriott (Per.).**—A valuable climbing sport from the dwarf of the same name, producing blooms of improved quality and substance. Color, rich coral red, passing to prawn red. Recommended as a pillar rose.
- *Cib. Mdm. Second Weber (H.T.).**—A strong climbing sport from the excellent dwarf, producing particularly fine blooms of a bright salmon rose color.
- Cib. Mrs. Aaron Ward (H.T.).**—A vigorous climbing sport of the dwarf. Color, Indian yellow with deep centre. Nice foliage.
- *Cib. Mrs. George Shawyer (H.T.).**—A sport from the well-known pink dwarf of the same name. Though liable to mildew, this variety is particularly valuable to exhibitors.
- *Cib. Mrs. Herbert Stevens (H.T.).**—The most free blooming white climber in cultivation, and a particularly strong climbing sport from the dwarf of the same name.
- Cib. Ophelia (H.T.).**—A strong climbing sport of the dwarf variety, producing sweetly scented blooms. Salmon flesh shaded yellow and rose in color.
- *Cib. Perle des Jardins (T.).**—A climbing sport of the yellow dwarf of that name, but is rather irregular as a climber.
- *Cib. Maman Cochet (T.).**—A particularly strong climbing sport of this popular pink rose. Recommended.
- *Cib. Radiance (H.T.).**—A strong growing climbing sport of the old favorite dwarf of the same name. A splendid pink climber, producing quantities of blooms throughout the season.
- Climbing Rose Marie (H.T.).**—A vigorous climbing sport of the popular dwarf, which should become a great favorite. Clear rose pink.
- Climbing Red Radiance (H.T.).**—The bright pure red blooms of this vigorous climbing sport of the popular dwarf should make this variety a decided acquisition to the climbing class.
- Climbing Souv. de Cladius Pernet (Per.).**—A splendid climbing sport of the beautiful dwarf which has just lately sprung into popular favor. Sunflower yellow.
- Climbing Souv. de Georges Pernet (Per.).**—Orient red shaded yellow. A vigorous climbing sport of the dwarf variety.
- *Cib. Sunburst (H.T.).**—A strong climbing sport of the splendid dwarf variety of the same name, producing splendidly shaped buds and blooms throughout the season.
- *Cib. Sunstar (H.T.).**—A climbing sport of the beautiful dwarf of the same name. Produces quantities of buds of novel coloring. Orange, edged and veined crimson and vermillion.
- *Cib. White Maman Cochet (T.).**—An extra strong climbing sport of the old favorite white dwarf. Recommended.
- *Cloth of Gold (N.).**—A pale sulphur yellow with deeper centre. An old favorite.
- Countess of Stradbroke (H.T.).**—A vigorous free blooming climbing rose, with large full flowers of a rich, dark, velvety crimson. Sweetly fragrant.

- ***Flying Colors** (H.T.).—Extra large single bloom. Color, deep cerise. Early flowering variety. Vigorous grower.
- Fortune's Yellow** (N.).—Large semi-double blooms. Color, bronzy yellow, shaded rose. Good pillar rose.
- ***Jessie Clark** (Hyb.).—A strong growing decorative rose with disease proof foliage, producing large single flowers of a rich pink color.
- ***Kitty Kininmonth** (H.T.).—A strong free blooming climber, producing semi-double flowers of immense size. Color, bright carmine-rose. Mildew proof.
- Mdm. Driout** (H.T.).—A beautiful striped pink sport of Reine Marie Henriette; same vigorous habits.
- Marechal Niel** (T.).—Rich golden yellow blooms of splendid shape. Suitable for exhibition. Sweetly scented.
- ***Mermaid** (Hyb. Bracteata).—A large single sulphur yellow bloom with beautiful stamens; the foliage is glossy; the whole plant being very graceful whether in bloom or not. Suitable for trellises or pillars.
- ***Miss Marion Manifold** (H.T.).—A fine climbing variety of vigorous growth. Color, rich velvety scarlet. Sweetly scented. Good foliage. Recommended.
- Noella Nabonnand** (T.).—Extra large, semi-single blooms with very large petals. Color, velvety crimson. Sweetly scented.
- Nora Cunningham** (H.T.).—A fine semi-double pink suitable for trellises or pillars.
- Reine Marie Henriette** (H.T.).—Large flowers of good form; color, rosy cerise. A splendid autumn flowerer.
- Reve D'Or** (N.).—Medium-sized, fairly full blooms of coppery yellow color. Very free flowering. Good foliage.
- ***Sachsengruss** (H.T.).—Color, flesh shaded rose; extra large, full, pointed blooms borne freely throughout the season. A splendid show rose.
- Sinica Alba**.—Large, single, pure white blooms. Glossy sky-green foliage.
- Sinica Anemone**.—Large, single blooms. Silvery pink deepening to bright rose. Glossy foliage.
- ***Souv. de Leonie Viennot** (H.T.).—Large, semi-double blooms borne freely throughout the season. Color, China rose shaded yellow. Very good foliage.
- ***Walter C. Clarke** (H.T.).—Dark red, moderately full blooms of good size and substance. Very free blooming and sweetly scented. Good pillar rose.

COOPER'S
ALBOLEUM

(White Oil Emulsion)

The best tonic for all Garden Plants, Trees and Shrubs, Ferns, etc.
Kills all Scale and other sucking pests. Prevents the spread of
Mildew on Roses.

1-pint tin, 2/6 (plus rate of Sales Tax).

Glorious Gerberas for Cut Flowers.

Climbing Polyantha, Banksia, Multiflora, Wichuriana Roses and their Hybrids.

1/3 each; 13/- dozen: Postage or Freight Extra.

***American Pillar (Wich.)**.—Large single blooms of a rich pink color with a white eye, borne in large clusters; shiny mildew-proof foliage. A vigorous grower.

Banksia Alba.—Pure white. Small, sweetly scented flowers, borne in clusters. Thornless.

Banksia Fortunei.—Large, pure white flowers. Extra vigorous grower.

Breeze Hill (Wich.).—Very large and double flowers produced in large clusters. Deep cream with tints of pink and salmon. Very vigorous and healthy.

***Cecile Brunner (Pol.)**.—A strong climbing sport of the dwarf pink. Good for an extra vigorous hedge.

Clb. Orleans Rose (Pol.).—Climbing sport of the dwarf variety. Carmine pink with white centre.

Crimson Rambler (Pol.).—Medium-size blooms borne in large clusters. Color, dazzling crimson. Liable to mildew.

Dr. Huey (Wich.).—The blooms are large, semi-single and borne in clusters of 3 or 4. Color, dark crimson maroon. Lasts well when cut.

***Dorothy Perkins (Wich.)**.—Large, full blooms of a bright shell-pink color. Sweetly scented. One of the best varieties, but liable to mildew.

***Emily Gray (Wich.)**.—Golden yellow. Large, fairly full blooms. Bright glossy, mildew-proof foliage. The best yellow available.

***Excelsa (Wich.)**.—Large, full blooms borne in large clusters. Color, bright scarlet.

Heart of Gold (Hyb. Wich.).—Color, crimson with white centre, with showy golden stamens. The blooms are single, borne in clusters, and up to three inches across.

Hiawatha (Wich.).—Large, single blooms borne in clusters. Color, brilliant scarlet; very showy, but mildews.

Isle de France (Wich.).—Color, crimson-red with white centre; blooms are large, semi-double, and produced in large clusters.

Paul's Scarlet Climber (Hyb. Wich.).—Large, semi-double blooms. Color, vivid scarlet shaded crimson. Strong grower.

Romeo (Wich.).—A very strong and fast growing variety with beautiful blooms of a dark red color, which are very full and last well when cut.

***Sanders White (Wich.)**.—Large full blooms of a pure white color. The best white available.

Tausendschon (Mult.).—Large, semi-double blooms, borne in large clusters and very sweetly scented. Color, rosy carmine.

Veilchenblau (Mult.).—Large, semi-double blooms. Color reddish lilac, changing to steel blue.

Violetta (Mult.).—Large, semi-double blooms borne in large trusses. Color, deep violet.

If in doubt leave selection to us.

STANDARDS

The stately standard, planted judiciously and given proper care, adds distinction to the garden.

Failure to obtain good results with standard roses may be traced to one or more of the following causes, viz., the purchase of unsuitable varieties or inferior quality plants, neglect to remove suckers at their first appearance, or to allow sufficient root room for the plant.

Regarding the latter cause, we advise allowing not less than 15 inches radius of cultivation round the standard; the more the better.

Standards should be planted in the more prominent positions, for preference in beds on lawns, or along the sides of a main path or drive. To produce the best effect when planting in a line, either straight or curved, the distance between plants should be in proportion to the total length required, e.g., for a line up to 50 feet, 5 or 6 feet apart would be close enough, while for a 200 feet line, 10 or 12 feet would be a more suitable interval.

Standards should be staked with hardwood stakes, well pointed and driven down to just below the off-shoots or "head," and tied firmly to top of stake, though tying should not be done for three weeks after planting, in order to allow soil to settle down. So as not to damage roots of the plant, stakes should be lined and driven in before planting.

Every standard rose is likely to send up suckers. These must be followed down at their first appearance and cut or broken out from the main stem.

The stock used is the South Australian Briar, which stands severe cold and intense heat equally well, yielding a very high quality bloom. Besides being neat in appearance, standards are space savers, leaving the ground beneath available for dwarf growing annuals.

Every year we import our standards as briars from South Australia, where they are grown on contract for us, and we bud them the following year. This we have found the best procedure, as it enables us to bud varieties most suited for the work and to send out thoroughly acclimatised plants.

Postal regulations make it impossible to send Standards by post.

Send Your Orders in Early.

SEARL'S LIMITED, 104 King Street, Sydney.

The varieties listed will be available from the end of April, on stems 30 to 36 inches high.

For descriptions see General List.

Price: 3/6 each; 39/- per dozen. Freight Extra.

Make Your Garden Bright with Searl's Plants.

STANDARD POLYANTHAS

4/- each; 45/- per dozen. Freight Extra.

These Standards have been budded on Noisette Briars, as the South Australian Briar is not suitable for the working of this branch of the rose family. As the stock is limited we have budded only a small selection—pinks and reds. For descriptions see the General Polyantha list.

Goldlachs

Ideal

Rufus

Orleans Rose

HEDGE ROSES

Certain varieties of roses make a very fine hedge, especially in good soil and in an open, sunny position. An ideal hedge rose must be free blooming, of good growth and branching habit, blooms of bright colour, held erect on long stems, and the foliage should be disease resistant.

For a vigorous hedge over four feet in height, the following are recommended:—

Reds.—Red Letter Day and Red Radiance.

Pinks.—Sunny South and Radiance..

For a moderate sized hedge up to three and four feet, the following are recommended:—

Reds.—Lady Reading (Poly.), Etoile de Hollande, and Rosa Indica.

Pinks.—Ellen Poulsen (Poly.), Salmon Spray (Poly.), and Shot Silk.

For borders and low hedges up to two feet in height, the following Polyanthas are recommended:—

Reds.—Ideal, Miss Edith Cavell, Mdlle. F. Favre, and Rufus.

Pinks.—Maman Turbat and Orleans Rose.

Salmon.—Goldlachs.

White.—Yvonne Rabier and Kath. Ziemet.

The distance apart for planting is as follows: For vigorous hedge varieties, 2 feet 6 inches apart; for moderate hedge, 2 feet apart; while for Polyanthas, about 21 inches is a suitable interval.

For full descriptions see General Lists.

Glorious Gerberas for Cut Flowers.

SEARLS' CARNATION LIST.

The colours of all flowers vary in some districts at different times of the year; during summer months they come much lighter in colour than in the cooler months.

The colours of the Carnations described in this list are from blooms growing under ordinary garden conditions. WE DO NOT RE-NAME VARIETIES.

NOVELTY CARNATIONS FOR 1931.

Varieties marked * are Fringed-edged Type.

***AMY JOHNSON.**—A lovely Carnation of the decorative type. The colour is a rich canary yellow with a very few pink splashes. The growth is very strong and grows as easily as ordinary garden varieties. Unlike most of the yellow varieties, this Carnation flowers profusely all the winter. 2/6.

***C. ANTON.**—A rich deep crimson self very sweetly perfumed. The flowers are large and can be grown fully four inches across. The growth is very strong, and, unlike most dark reds, very free from disease. A good winter flower, and calyx non-bursting. 2/6.

MARION KEEL.—This variety is quite distinct from any other Carnation at present. The colour is bright orange shaded with darker marks. The flowers are large with broad, smooth-edged petals and nicely built up in centres. The colour will appeal to all. The plants are strong and produce blooms throughout the year. 2/6.

MRS. H. HARFORD.—This variety is of the strong-growing sort, which is free flowering. A pretty fancy having extra large flowers of excellent form with broad, smooth-edged petals. The colour is white thinly edged and lightly dotted bright red. Good calyx and very strong stems. 2/6.

KEITH ANDERSON.—Flowers are large, of most beautiful form, with large, clean-cut petals. The stems are strong and carry the flowers erect. Colour, white ground heavily edged and marked dark red. Growth strong and healthy. 2/6.

The above set of five beautiful novelties for 12/6. Postage, 9d. extra.

CARNATIONS RECENTLY INTRODUCED

Varieties marked thus x are fringed-edge type.

- x Ada Reeve.—White, prettily marked pink, a very vigorous grower, which flowers all the year; has large flowers and sound calyx. 1/6 each.
- x Sussex White.—Pure crystal white, a vigorous perpetual grower, recommended as a florist's flower. 1/6 each.
- Shelia Maher.—A rich, deep, velvety, crimson self, having smooth-edged petals. The stems are exceptionally long and strong. The calyx is good; a very strong grower and free flowerer. 2/- each.
- x Vaste.—A sport from "Marnie," having the same vigorous growth and flowering qualities, being different only in colour, which is pink striped and splashed deep pink. 1/6 each.
- x Canary Bird.—The colour is a bright canary yellow. The growth is strong and healthy; flowers of medium size. 2/- each.
- Edie (Plain).—A pearly white ground, flaked pink; distinct from any other variety. Flowers large, broad, well-placed petals, stems long and calyx sound. 1/6 each.
- Ethel Hodges.—Medium size. Colour a white ground heavily edged bright red; stems long and wiry. 1/6 each.
- Evelyn.—A pure white ground daintily edged and marked bright red. A good show flower. 1/6 each.
- F. Goodyear.—Colour deep crushed strawberry, flowers large, well formed, smooth-edged petals, strong stems. 1/6 each.
- Glow.—Buff ground, sufficient scarlet making a very attractive flower with nicely shaped smooth-edged petals. 2/- each.
- Isabella.—A white ground fancy-edged and pencilled maroon. A perfect show flower. 1/6 each.
- J. Penman.—Flowers up to four inches. Colour a bluish mauve. Growth strong and healthy, good shape. 1/6 each.
- Maggie.—A pure white ground with deep maroon markings; flowers are well formed and carried on long, stiff stems. 1/6 each.
- Miss V. Gam.—Pure white ground, marked and splashed maroon. The flowers are very large and well formed; growth strong and vigorous. 1/6 each.
- Meg.—White ground, heavily marked deep crimson. 1/6 each.
- Mrs. Loughlin.—White, lightly edged and thickly dotted red. Good size, very long stems. A good winter variety. 1/6 each.
- x Promise.—The best maroon self. Flowers large and well formed, nicely built up in the centre. 1/6 each.
- Purple Emperor.—Purple self, the best of its colour. 1/6 each.
- x Reggie.—A lightly fringed decorative, large flowers. White ground, pencilled red; growth and length of stem phenomenal. 1/6 ea.
- x Red Denet.—One of the best bright reds yet introduced; the flowers are very large; deeply serrated and sweetly scented; non-bursting calyx. 1/6 each.
- Rosa.—Pure white ground, beautifully edged and pencilled with scarlet markings. Very large. Long stem. Vigorous. Good show type. 1/6 each.
- x Sally.—Deep pink ground with darker splashes and markings. 1/6 ea.
- x Saffron.—A clear yellow sport from the well-known "Sunstar," having the same large well-formed flowers. This is the best yellow Carnation in commerce. 2/- each.

Quality is Our Leading Feature.

CARNATIONS RECENTLY INTRODUCED.—Continued.

- x **Snowdon.**—Largest mauve with broad marks of cerise. 1/6 each.
x **Sunstar.**—Almost a yellow self, having a few pink splashes. 1/6 ea.
Virginal.—A pure white. The growth is good. 1/6 each.
W. Bell.—The ground colour is yellow, heavily edged and marked red; the growth is very strong and clean. 1/- each.
x **W. Ayliffe.**—Quite distinct. The colour is a deep apricot heavily marked, edged heliotrope. Flowers large and full. Growth very vigorous. A good garden variety. 1/6 each.

CARNATIONS—GENERAL LIST.

All at 1/- each; 10/- per dozen.

- Apsley.**—Well-known pink.
Anona.—Pale pink, good.
Australia.—The ground colour is pink, splashed deeper pink.
Belgium.—Scarlet winner of many prizes.
B. Jolley.—Pale yellow with markings of mauve and purple.
Camille.—Salmon scarlet, extra good cut flower.
Denet.—Pale flesh pink, large, with long stems.
Lily Moffat.—Yellow ground, edged and marked pink.
Miss L. McGrath.—Crushed strawberry, good size, strong stems.
Mrs. P. L. Stevenson.—White, few marks of scarlet. Winner of many prizes.
Mother's Day.—A good white.
Marnie.—Soft shell pink; good cut flower variety.
Painted Lady.—Cerise pink; extra good winter flowerer.
SALAMANDER.—A lovely shade of salmon pink. One of the best for cut flowers.
Wunda.—Deep crimson; good, strong grower.

POSTAGE OF CARNATIONS: 1 or 2 plants 6d., 12 1/6.

COOPER'S

KATAKILLA

**Non-Poisonous Insecticide Wash for
FRUIT, FLOWERS AND VEGETABLES.**

Kills all Aphis, Mites, Caterpillars, etc.

Packet to make 10 galls. spray, 1/6.

(Plus rate of Sales Tax.)

You Will Always Note Our Careful Packing.

FRUIT TREES

Space will not allow the varieties to be listed, but any sort can be supplied. Where left to our selection only sorts suitable to the district will be sent.

Rail or Postage extra.

Special Quotations for Quantities.

APPLES.—All worked on blight-proof stocks. All the leading varieties. 1/6 each, 16/- doz.

APRICOTS.—This fruit requires a dry, warm soil. Unless well drained, the fruit will be very inferior. Highly esteemed for both kitchen and dessert. All the leading varieties. 1/6 each, 16/- doz.

CHERRIES.—This favourite fruit can be grown with very little trouble, but requires a cold situation and moist soil. 2/- each, 20/- doz.

NECTARINES.—To attain perfection, the Nectarine requires a strong loam, thoroughly drained. All the leading varieties. 1/6 each, 16/- doz.

PEACHES.—Requires treatment similar to the Nectarine. It is a most delicious fruit, and may be used in a variety of ways. All the leading varieties. 1/6 each, 16/- doz.

PLUMS.—All the leading varieties. 1/6 each, 16/- doz.

JAPANESE PLUMS.—The Japanese Plums are eminently suited to our climate. Hardy, of vigorous habit and growth, and very prolific. All the leading varieties. 1/6 each, 16/- doz.

PRUNES.—Worked on Myrobolan Stocks. Treatment similar to Plums. All the leading varieties. 1/6 each, 16/- doz.

PEARS.—This choice fruit is very much neglected in this State. All the leading varieties. 1/6 each, 16/- doz.

FIGS.—This delicious fruit can be grown in almost any situation, but a moist, sandy loam suits it best. The tree will produce several crops in one season. All the leading varieties. 1/6 each, 16/- doz.

SEARL'S SELECTED CITRUS FRUITS.

ORANGES.—2/- each, 21/- doz.

MANDARINS.—2/- each, 21/- doz.

LEMONS.—2/- each, 21/- dozen.

You Will Note Our Careful Packing.

FRUIT TREES.—Continued.

QUINCES.—A most useful fruit for preserving and culinary purposes, and may be grown in low, moist soil where other fruits will not grow. All the leading varieties. 1/6 each, 16/- doz.

GRAPE VINES (Rooted).—All leading sorts. 9d. each, 8/- doz. On Resistant Stock. 1/9 each, 18/- doz.

GRAPE FRUIT (Edible Pomolo).—Marsh's Seedless. 2/6 each.

GOOSEBERRIES.—1/- each, 8/- doz.

RASPBERRIES.—6d. each, 5/- doz.

CURRENTS.—1/- each, 8/- doz.

WALNUTS.—2/6 each.

MISCELLANEOUS FRUITS.

ALMOND (Jordan).—Very strong grower. Tender shell. First-class bearing variety. 1/6 each.

CHESTNUTS (Spanish).—2/6 ea.

CHESTNUTS (Japanese).—2/6 ea.

CUSTARD APPLE (also known as the Cherimoyer).—A delicious fruit, suitable to warm climates. 2/- each.

FILBERTS.—1/9 each, 18/- doz.

GUAVA (Purple).—Famed for making jelly. 1/6 each, 15/- doz.

GUAVA (Yellow).—Very large. Splendid dessert fruit. 1/6 each.

HOVENIA DULCIS.—A peculiar fruit, better known as the Chinese Raisin. Very sweet. Bears fruit in clusters. 2/- each.

LOQUAT (Heard's Mammoth).—Splendid shelter tree. Useful fruit. 2/- each.

MEDLARS.—2/6 each.

MULBERRY (English).—The finest of all varieties. 3/6 each.

MULBERRY (Cape).—A useful culinary variety. Very prolific. 2/6 each.

MULBERRY (Downing's).—Long, black fruit. An immense crop. 2/6 each.

POMEGRANATE.—A useful and highly ornamental fruit. 1/6 ea.

PASSION FRUIT (Edulis).—The common passion fruit. In pots, 6d. each, 5/- doz. From open ground, 2/- doz., 7/6 100.

PERSIMMONS (Japanese).—All the best. 2/- each, 21/- doz.

PECAN NUT.—2/6 each.

LOGANBERRY.—A hybrid, between the Raspberry and the Blackberry. 1/- each, 9/- doz.

STRAWBERRY PLANTS.

Price: 1/- dozen, 5/- 100.

Postage: 6d. doz., 1/6 100.

ANNETTA.—Very early and hardy.

ILLAWARRA.—The berries are fine red colour; flesh solid and rich in flavour.

ABUNDANCE.—A fine, hardy sort.

CRESWELL'S SEEDLING.—An excellent market sort.

MALAKOFF.—Very early.

RHODES SPECIAL.—A very fine variety, good foliage, extra large fruit.
